

## Online Banking Cross-Account Transfer Feature

The Cross-Account Transfer feature of Online Banking allows you to transfer funds from your account to another Tech Credit Union member's account.

The following account verification process is required prior to using the cross-account transfer feature:

1. Call or visit any branch to notify us of the account number(s) you would like to transfer funds to using Online Banking.
2. Branch staff will process your request and call you back at the phone number we have on file for the primary account member. You will be asked security questions to verify your identity.
3. Cross-account transfers for the accounts you request will be enabled.

**Please note:** This one-time process must be completed for each Tech Credit Union account you would like to transfer funds to using Online Banking. You may request set-up of more than one account when you contact us.
